Product Summary

Tungsten ControlSuite

Transform your document capture, print and mobile workflows with content-aware process intelligence in a single fully integrated suite that supports modern cloud-based services.

Extend the Value of Your Multi-Function Device (MFD) Investments with Multi-Channel Document Workflow Automation

Tungsten ControlSuite™ is an on-ramp for your digital transformation initiatives. By augmenting MFDs with intelligent automation capabilities and by connecting to business systems, ControlSuite delivers increased efficiencies and productivity while maximizing document security and ensuring compliance. Work with information across all channels. Transform your data into actionable insights and deliver it directly into your core business applications and processes.

How Does Tungsten ControlSuite Work?

Tungsten ControlSuite is an integrated solution that can automate a wide range of document-dependent tasks. Core business functions include:

Automated Content-Based Workflows

Advanced capture and print capabilities digitally transform workflows, driving efficiency and productivity while enabling security.

Integrated, Flexible, Scalable

For businesses of all sizes with flexible packages, ControlSuite delivers value aligned with your immediate and long-term needs, empowering growth from print through capture.

A Unified User Experience

A seamless and consistent user experience with a unified client for print, capture and mobile across all devices. Experience maximum convenience, ease of use and output security.

Predictive Analytics Dashboards

Visualization of print and capture workflows across your multi-fleet environment delivers insights to drive decisions and manage costs.

Support for Modern Cloud-Based Services

Leverage higher levels of security and improve efficiencies through integration with cloud-based solutions like Azure Active Directory, Azure SQL, Tungsten Printix and Microsoft Universal Print.

Benefits of Tungsten ControlSuite

Tungsten ControlSuite is a document workflow transformation enterprise software solution within the Tungsten Intelligent Automation platform that integrates content-aware document capture, print and output management capabilities to deliver key benefits, including:

Maximize security: Ensure document security with content-aware workflows. Provide audit trails with an information chain of custody.

Safeguard compliance: Apply consistent business rules and data protection policies like automatic redaction and watermarking.

Accelerate work and drive productivity: Enrich information quality, increase accuracy and reduce error-prone manual tasks.

Keep your workforce agile, connected and productive: Deliver the power of mobile workflows to remote workforces with mobile capture, secure print release, elimination of paper forms and digital signatures.

Enhance intelligent capture capabilities: Integrate with Tungsten TotalAgility to transform business process automation across enterprise document management workflows.
