

# Turbocharge Your Accounts Payable Process in Titan DMS

**You can now manage all your supplier invoices in Titan DMS. Eliminate your reliance on physical paperwork and increase efficiency with a customised accounts payable solution integrated with Titan DMS.**

FUJIFILM Process Automation has partnered with Titan DMS to deliver accounts payable automation integration to the Titan DMS platform. Enhance the way you manage invoices with an accounts payable solution that integrates seamlessly with your Titan DMS system. From data capture, invoice and PO matching to validation, approval workflows and payment processing – automation can remove the hassle, minimise time and costs associated with manual accounts payable processes.

## Why integrate FUJIFILM Process Automation accounts payable (AP) automation into Titan DMS:

### Reduce costs and storage

Time is money and with AP automation you can lower costs, reducing the need for data entry, manual processing, and eliminate the costs associated with physical document storage.

### Superior service

Help keep your suppliers (and team members) happy by minimising the risks associated with human error. Say goodbye to frequent incorrect, late, missed, and duplicate invoices.

### Improve visibility

Get a real-time view of your expenditure, cashflow, and vendor interactions, enhancing your reporting capabilities and aiding you to make informed decisions.

### Automate workflows

Seamless AP integration with Titan DMS gives you greater consistency across all systems and efficiencies, giving your team more time to focus on customers, not admin.

### No more bottlenecks

Streamline approvals, instantly search and retrieve information, automate data entry, and easily match POs to invoices in one platform, helping you to save time and improve efficiency.

### Compliance and Governance

Access audit trail information when you need it. With AP automation, all your records are retained, from who handled it to when different actions were taken, and more.

Steer your dealership towards success. Transform your accounts payable process from a resource-heavy business necessity to a powerhouse with **5 simple steps**:

# 01

## INVOICE CAPTURE AND EXTRACTION

Automatically capture digital copies of your invoices (scanned, emailed, or physical), key information is extracted and stored in a centralised location.

# 02

## SIMPLIFIED WORKFLOW

Workflows capture data entry, match invoices to P.O.s, payment approval, and invoice validation, all based on your preset approval flows.

# 03

## TITAN DMS INTEGRATION

The data is then uploaded into your existing Titan DMS.

# 04

## PAYMENT PROCESSING

Invoices are automatically directed to your accounts team to process.

# 05

## VISIBILITY AND INSIGHTS

Gain real-time visibility of invoices ready for processing, outstanding POs and projected payments.

At FUJIFILM Process Automation, we love taking the mundane off your dashboard. With extensive experience in the automotive sector, we understand the challenges you face — and we know how to clear them.
