

Integrated work process transforms your workstyle

# FUJIFILM IWpro

# Can you relate to or encounter similar challenges when it comes to the digitalisation of work?

Today's workplace is digitised, yet there still exist many manual tasks, which result in rework, duplication, and errors.

This is because different workflows and systems are operated separately, and the gaps between them need to be connected manually.

## Productive

I can easily share information and collaborate as a team!

## FUJIFILM IWpro is your one-stop solution!

## Streamlined

Data input is hassle-free!

## Efficient

I don't have to search everywhere for documents anymore!

## Smooth operations

Easy to operate, so I do not need to get helped!

# FUJIFILM IWpro empowers businesses to conquer the barriers of digital transformation.

FUJIFILM IWpro is an all-in-one secure platform solution for business digitisation, provide workspace for collaboration, workflow optimisation, efficient document management of metadata and documents, and versatile cloud-based printing capabilities.

## ONE Collaboration Platform

Streamlines information and tasks, reducing individual dependence. Empowers teams to work together more efficiently and effectively.

## CHANGEABLE processes

Without special IT skills, and without big changes on current systems and external communication method.

## EASY to Start

Easy operations by minimising manual work between systems. Best solution for work process with various documents and data.

## With anyone, from anywhere. Transforming work style through connections.

### FUJIFILM IWpro

#### Centrally Manage Information on the Cloud

Documents are automatically imported, converted to digital data and managed on the cloud. Job status and progress can be shared among team members. Linkage with the currently-used business system is available.

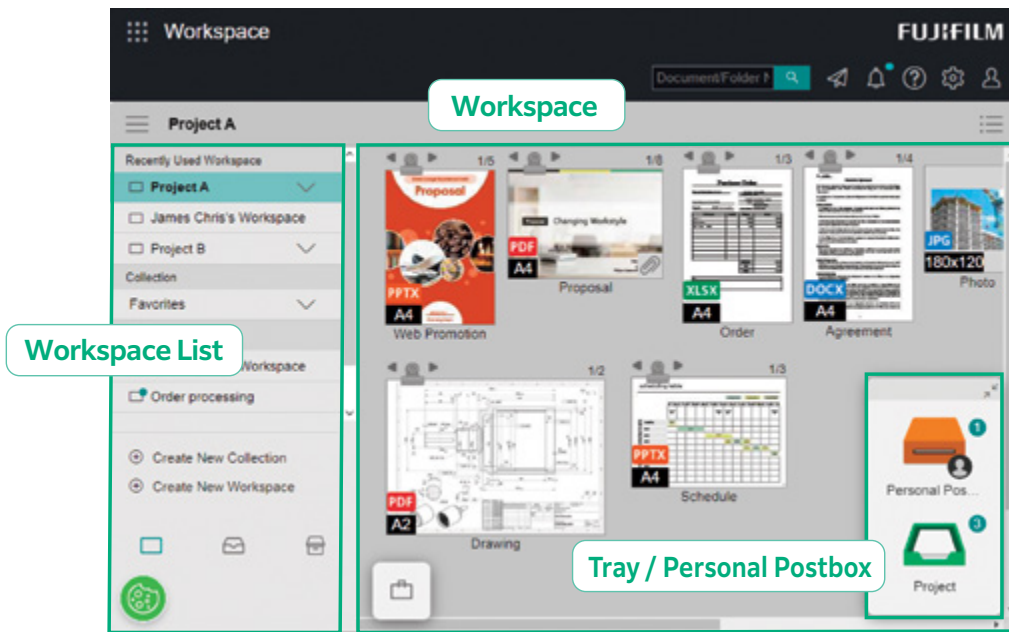

#### A Workspace for Everyone

“Workspace” is a collaborative area for everyone to share documents and information. You can easily manage, edit, store, and print documents with easy operations.

# Connecting People

Creates a synergetic space where everything and everyone gathers, promoting both internal and external collaboration.

## Connecting People with "Workspace", a Collaborative Space for Sharing Various Documents Relating to Work on a Same Platform

### What is Workspace?

Workspace is a space to perform document-related tasks such as viewing, sharing and editing documents.

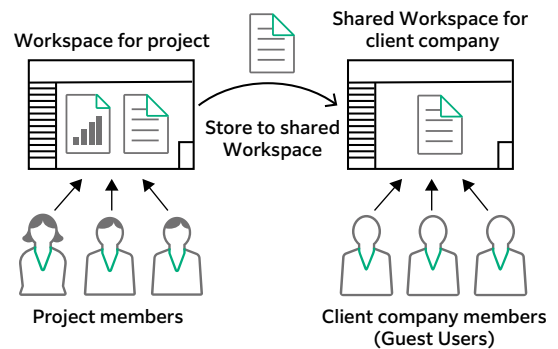

## Register Members and Share Business Items

### Create Multiple Workspaces for Specific Tasks

Invite external business partners as guest users to the workspace to facilitate document sharing and collaboration.

### Effectively Share Task Status Updates with Team Members

Effectively share documents among organisations or with clients via Workspace to enhance internal and external collaboration.

## Easily Locate Required Document in Various View Settings

### List View

Document information is listed in table.

Using List View, it is easy to identify documents from its relevant information, such as client name, date, assigned person's name and job status.

Name	Created By	Last Update	Size	Status	Order Date	Grand Total	Order No
Order A	Chris James	09-15-2023 4...	42.6 KB	Answered	09-12-2023	1,200.49	12340
Order B	Smith John	09-15-2023 4...	42.6 KB	Registered	09-12-2023	980.12	12346
Order C	Chris James	09-15-2023 4...	42.6 KB	NEW	09-14-2023	876.10	12347
Order D	Smith John	09-15-2023 4...	42.6 KB	NEW	09-15-2023	1428.89	12348
Order E	Smith John	09-15-2023 4...	42.6 KB	NEW	09-15-2023	1620.00	12349

### Thumbnails View

The images of documents in Workspace are displayed as thumbnail image. Documents can be easily recognised by its image data.

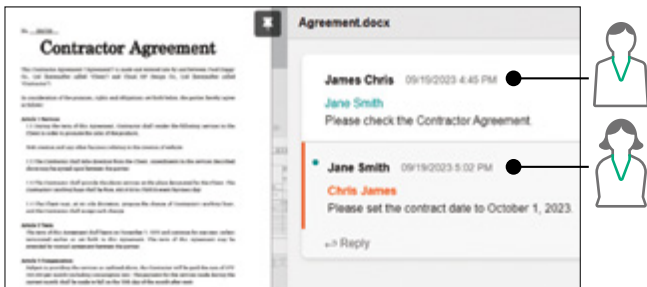

## Facilitate Better Communication with a Comments Function

### Comments Function for Better Communication

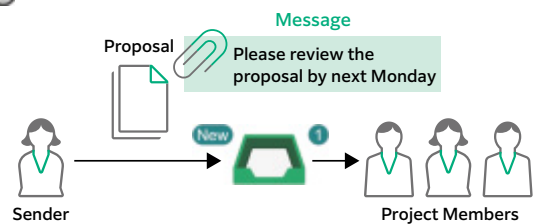

Users can add comments to documents. Other members are notified of the comment, and can instantly begin communication with the sender. This eliminates the hassle of preparing and sending an email with attachments.

### Deliver Documents with Tray or Personal Postbox

Users can add comments to documents when storing in Tray or Personal Postbox. When a new document is stored, notification is sent either in the form of an icon or message. This prevents the delay of processing the document due to overlooking a relevant email in the user's inbox.

- Tray Shared by Team Members**  
Tray is used to deliver files among registered users.
- Personal Postbox : Personal tray**  
Personal Postbox is used to deliver files to specific user.

## Supports Online Editing

### Concurrent Editing as a Team

A single document can be concurrently edited by multiple members connected online. This reduces the time it takes to complete a project as activities can be performed concurrently.

Note: Requires Microsoft 365 contract.

### Prohibit Changes to Content Using Lock Setting

Locking a document prevents editing by other users.

## Packed with Various Editing Functions

### Consolidate Documents of Different Formats

Documents in various formats can be easily bundled and combined into a single file with simple drag-and-drop operation. This is especially useful when creating documents that contains tables and image files of different application files, such as proposal documents.

### Page Edit Functions

Users can extract, reorder and delete pages, and split document at specific pages. Documents can be easily edited without going back to and working on the original file.

### Attach Stamps and Notes

In addition to basic stamps, custom stamps and notes, such as handwritten signatures, can be composed and attached to documents.

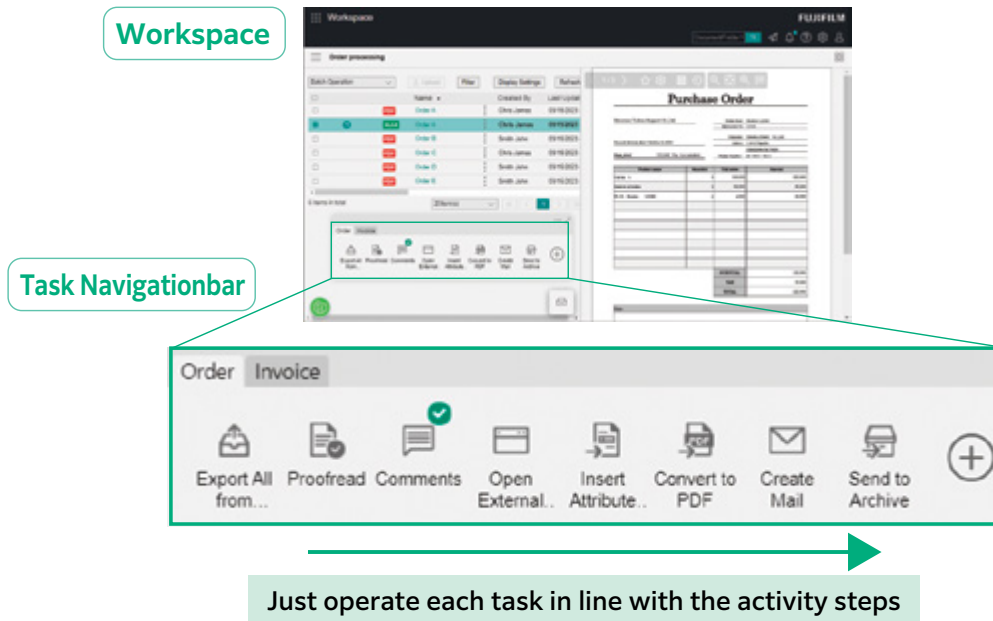

With FUJIFILM IWpro

The latest information can be shared with everyone, including clients, partners, and even salesperson on-the-move, driving business concurrently.

# Connecting Processes

Simplify manual processes and integrate them with existing systems to enhance workflow productivity.

## Task Navigationbar Improves Activity Efficiency

### What is Task Navigationbar?

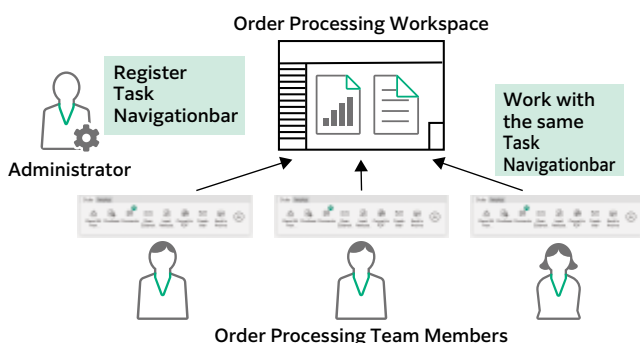

Task Navigationbar is a versatile toolbar that allows you to register and manage various processes according to your workflow. These processes include importing and editing documents, calling a business system, and delivering / storing documents. By clicking the menu buttons on the Task Navigationbar one by one, workflows can be processed efficiently, and errors and rework can be eliminated.

### Optimise Workflow Efficiency by Creating Standard Workflow

Work processes that required to complete the task can be registered to the Task Navigationbar. Simplified workflow steps can minimise errors and rework, and improve work efficiency. Optimising the steps involved in an activity can help reduce oversight and rework, resulting in improved efficiency for business tasks.

### Sharing Task Navigationbar Between Members

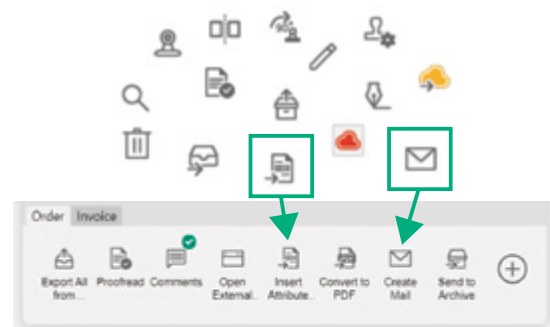

Task Navigationbar can be shared among members who use the same Workspace, such as order processing team.

### Personalise Button Layout to Suit Your Needs

Offers a range of tools that can perform specific activities for your workflow with a single click.

Arrange tools on the Task Navigationbar in a way that optimise the button layout for your workflow.

### Templates

Supports customisation of the Task Navigationbar to fit with the existing workflow.

Example)  
 Order Process Sample  
 Multi-Channel Capture & Delivery Sample  
 Multi-Channel Capture & File Management Sample

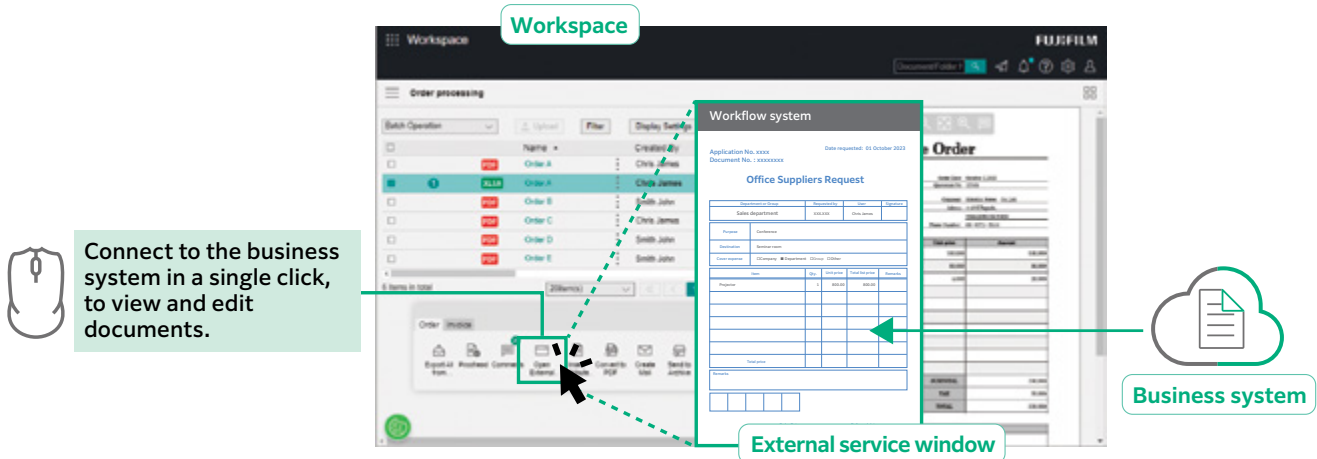

## Link with Your Existing Business System Via the External Service Window

### Operate via the External Service Window

A simple click of a button on the Task Navigationbar opens the External Service Window, allowing users to access documents and data managed and stored in the business system through a browser.

### Seamlessly Links with Your Existing System

Perform data operations such as registering files in the system, electronically signing contracts, and posting to approval forms on the External Service Window, to eliminate conventional manual data entry process.

### Linkage Tools

Offers tools to link with your existing business system, which can be mounted on the Task Navigationbar and operated by a single click.

### Links with Various System in CSV format

Document information such as client name, date, and name of the person in charge can be extracted in CSV format and linked to various business systems.

## Clear Insights of Business Process and Progress

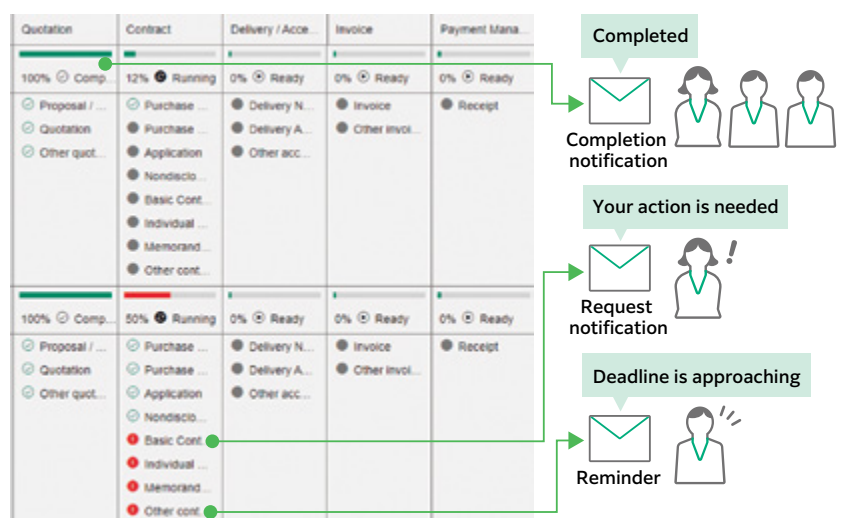

### Visualise Work Process and Progress

Defining the required actions and information for each step of the workflow, the workflow can be visualised.

This helps to centralise work progress confirmation and output management.

### Automatic Notification of Required Activity

Send notifications to users automatically to notify job status, such as request for processing the job, approaching deadline.

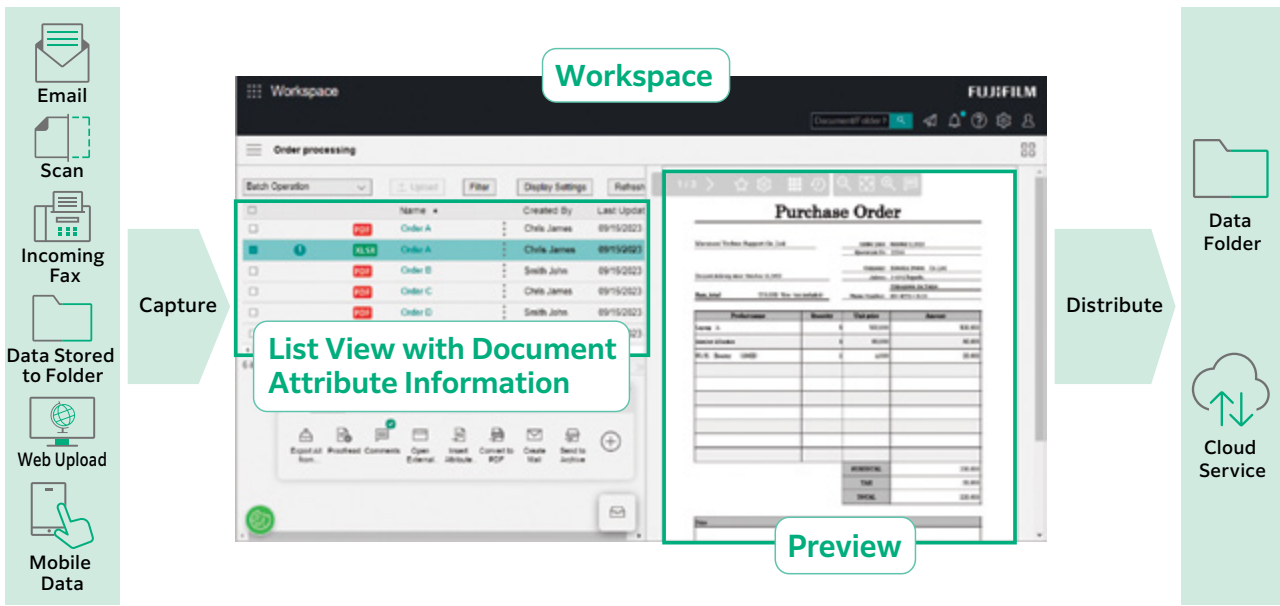

With FUJIFILM IWpro

Work can be handled with simple operations and contents can be shared smoothly, accelerating your business.

# Connecting Information

Convert all documents to data to connect information from document importing, utilisation, management, recording, and distribution.

## Importing Data from Various Sources

Import data from various sources, such as paper documents, incoming faxes and emails, then converts to digital data that can be used in various systems.

Data is listed by document attributes such as company name and date, preventing overlooked jobs.

### What is an "Attribute" of a Document?

An "attribute" is information associated to the document, such as author and date.

When importing a document with FUJIFILM IWpro, the document attributes are stored in a database which allows for document search functionality.

## Document are Automatically Captured and Distributed

### Automate the Process of Capturing Documents Using Rules

With FUJIFILM IWpro, you can choose from a variety of templates that come with predefined document processing. This allows you to automate tedious tasks such as importing data from documents that come in various formats, inputting data, and sorting documents based on your workflow.

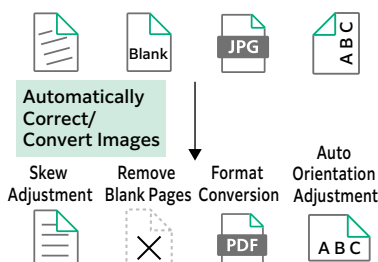

### Rule-based Automatic Distribution

Documents are automatically distributed according to pre-set rules, such as storing or sending to different destination by customer or by job type.

### Image Adjustment

With file format conversion, skew and orientation adjustment and removal of blank pages, documents are easy to handle in the later processing.

### Extract Text Data with OCR Automatically

Equipped with OCR function that extract text data from the document automatically. Extracted text data is saved and can be used for searching and other purposes.

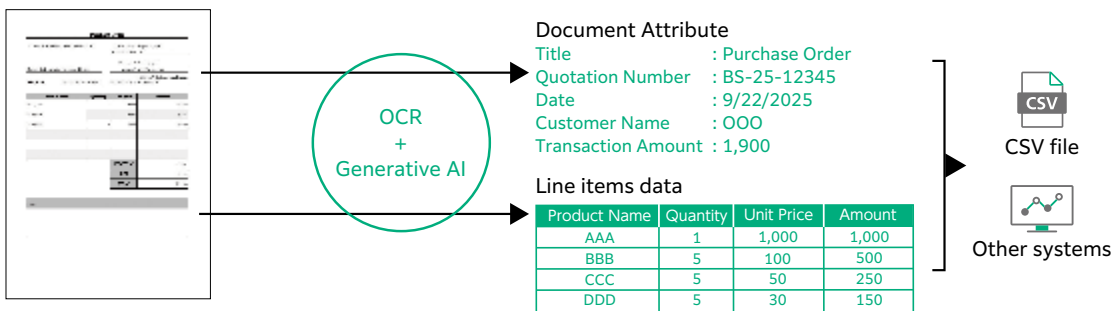

## Generative AI OCR technology enables to utilise data

Generative AI OCR technology supports the entire process from data extraction to output other systems.

### Data Extraction by Generative AI

Generative AI analyzes and extracts line items data from invoices, purchase orders, and similar documents. Extracted data can be used for validation and output into other systems. Generative AI technology also improves recognition accuracy for unclear scanned documents.

## User Friendly Document Management and Access

### Categorization View Helps to Find Your Document

In addition to the standard document folder structure, "Categorization View", which displays a virtual folder structure starting from your specified attribute, is available.

Categorization View helps to find the document you need based on your search method.

#### Normal View

Fixed folder hierarchies are managed according to established rules.

#### Categorization View

Virtual hierarchical display of attribute data as keywords

### Fully utilise Various Information Using Diverse Search Functions

In addition to full-text search and attribute search by client name, creation date, etc., a variety of search functions can be used to find the desired document, including image search that captures text strings within the image.

### Protects Critical Documents with Robust Access Control Mechanism

Critical documents are securely protected by setting access rights for each document or folder.

Access is controlled by setting detailed permissions for viewing, revising/updating, modifying, and displaying version history.

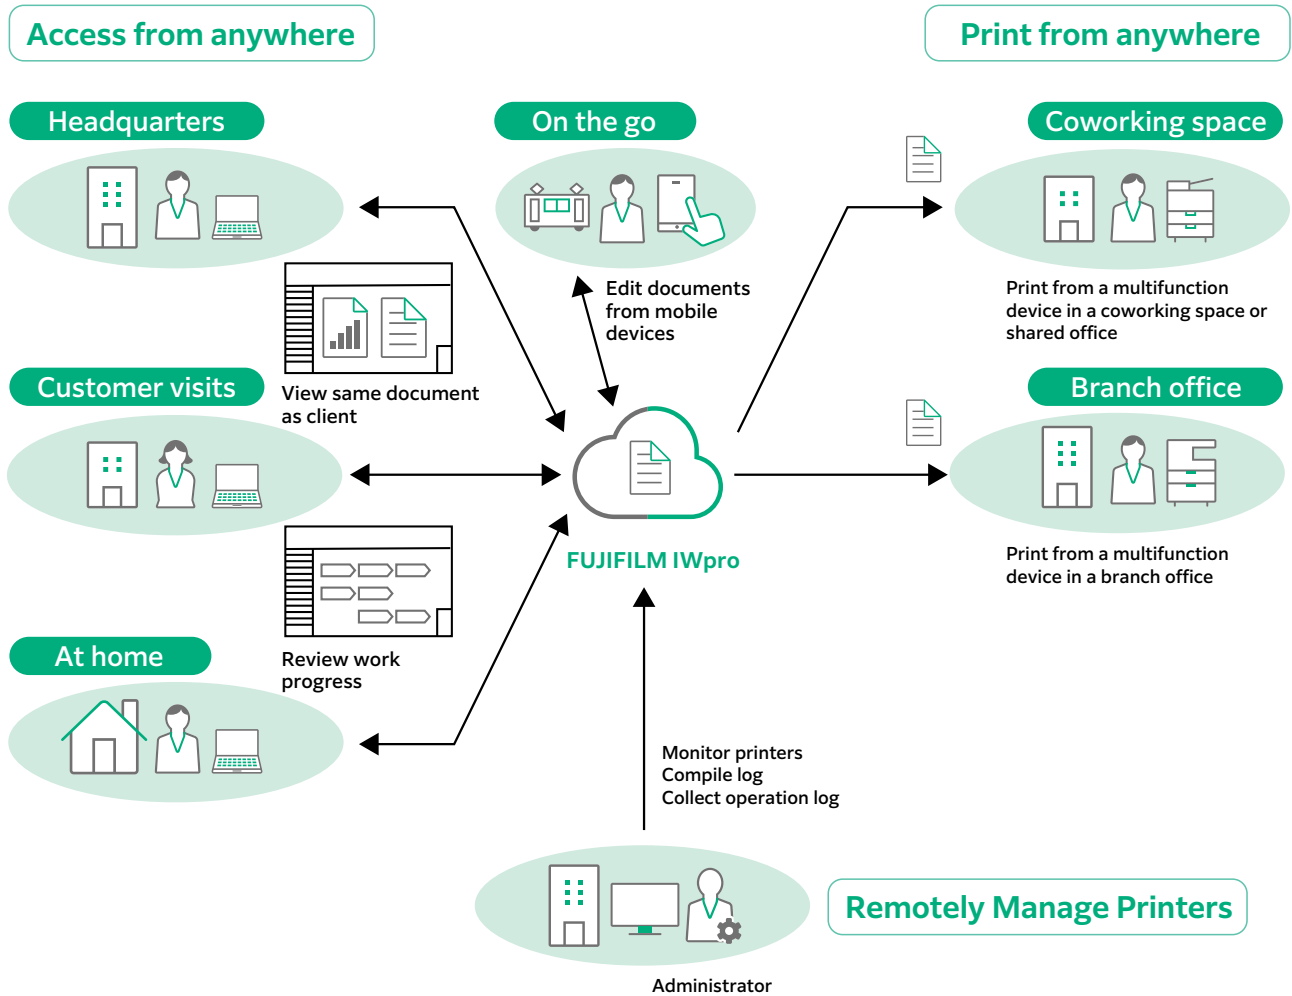

With FUJIFILM IWpro

Boost productivity from cumbersome manual work and generated supportive work environment within your office based on the work progress.

# Connecting Places

Connect every workplaces with a system that is accessible from anywhere, regardless of physical location.

## Utilised a Web Browser Interface to Establish a Secure Environment Accessible from Various Locations and Terminals

### Accessible from Various Terminals

Support access from Windows OS, Mac OS and mobile devices (iOS and Android™ OS).

Windows OS

Mac OS

iOS  
Android™ OS

MFD

Support scan and print from multifunction device

### Accessible from Various Places

FUJIFILM IWpro is accessible via a web browser from any location that has internet service, such as from branch office or on the go.

### Print Anywhere

High-quality and secure print environment is available regardless of your location, either in or out of your office.

In headquarters / branch office

In factory / warehouse

In coworking space / shared office

## Secure Print Environment at Anywhere

### On-demand Printing While On-the-Move

Users can select and print the document that store in the cloud with the multifunction device outside of office.

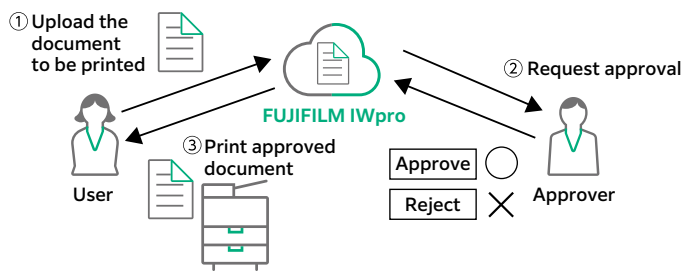

### Print with Shared Users\*

Using "Shared User" function, temporary user such as visitor can print document without user registration. Just upload the print data from the Web link provided by the administrator.

### Offsite Print

The approval printing configuration ensures that printing can only commence after receiving approval from a supervisor, effectively safeguarding against information leaks that may arise from off-site printing activities.

## Centralised Printer Management Helps to Manage Usage Status Remotely

### Automatic Compilation and Display of Usage Analytics

With FUJIFILM IWpro, administrator can easily compile and manage usage status of printers from a Web browser. This reduces the administrator's burden and also helps to reduce total cost of ownership.

Various aggregation options, such as by device, user, organisation, etc.

- Charge cost to each organisation
- Optimise printer allocation
- Raise user's awareness on print cost

Administrator

### When Printing, Display Usage Status

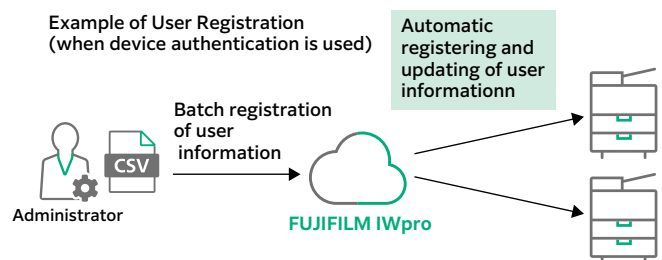

When a user prints a document on a multifunction device, the usage status is displayed on the device's panel. This allows the user to keep track of the number of pages they are printing, among other information.

Contributes to cost reduction by raising users' awareness of cost

User

### Simplify User Registration for Multiple Devices

Supported printer models come with the capability of automatic user registration, making the process more straightforward. Moreover, you can opt for synchronisation with Microsoft Entra ID\* and LDAP servers, streamlining the user registration process.

\*Former name: Microsoft Azure Active Directory (Azure AD)

With FUJIFILM IWpro

Both employees and administrators can work efficiently regardless of their location, whether on the move or working remotely.
