

# MPS Guardia Security Services

## Managing and securing your print environment

An unsecured print environment exposes organisations to significant security risks, including data breaches, operational disruptions and compliance issues. Effective management of security settings and policies across the entire fleet of print devices is crucial.

MPS Guardia takes a holistic approach to printer fleet management and protection, with end-to-end layered security. From the devices themselves to documents and data, it offers the latest protection against ever-increasing security threats. Additionally, MPS Guardia delivers seamless control, improved uptime and enhanced productivity in one trusted package.

## Value to your business

### Secure Device

- Protect devices with tailored end-point security protocol based on organisational compliance requirement.
- Safeguard devices through centralised password management & firmware updates.
- Offline managed print service for compliant environment.
- Report and dashboard to enhance governance & accountability.

### Secure Document

- User-based authentication to prevent unauthorised printing.
- Secure document handling with secure print release.
- User-based policies to enhance security by tailoring print habits of individual users.
- Deep dive into print usage with comprehensive device and user-level reports and an interactive dashboard.

### Secure Data

- Ensure sensitive information remains encrypted (https/SSL) when data is transferred from the device to FUJIFILM platform.
- Data stored in FUJIFILM infrastructure is hosted in a secure environment and fully compliant with ISO 27001 standards.

## Take the first step towards comprehensive print security.
