

# Ensuring Success Through Future-proof DX Initiatives

## Why Business Resilience Matters

Today's business leaders face many disruptions:

High inflation rates

Economic downturn

Geopolitical tensions

Cybersecurity threats

# 30%

of a company's financial performance\* is driven by how it handles crisis'

\*Relative total shareholder return (RTSR)

To succeed, businesses must bounce back, adapt and find opportunities amidst adversity. Many are turning to Digital Transformation (DX) to do so.

## Three Key Areas of Business Resilience

### Workforce

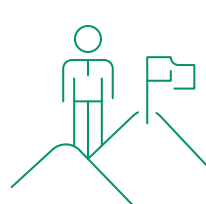

Employees who can adapt and thrive amidst sudden change

Reskilling will help build resilience and yield savings<sup>2</sup>:

**Cost of replacing an employee**

> 100% of role's salary including recruitment and training costs

**Cost of reskilling an employee**

< 10% of role's salary

### DX Solutions

Digital tools that enable **seamless communication and collaboration** help employees stay on top of tasks during uncertain times.

Cloud-based documents can promote **collaboration between teams** by making files easily accessible and editable.

Cybersecurity solutions enable employees to **work seamlessly** without any distractions or disruptions caused by cyber attacks.

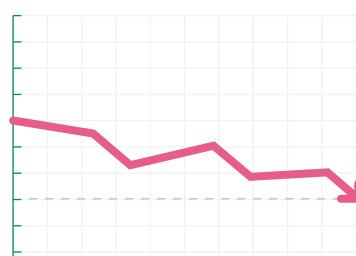

**Place the employee experience at the centre of** tech investment decisions to build trust and improve overall performance.

### Workstyle

Productive, sustainable ways of working

These can include flexible work arrangements and workflow optimisation.

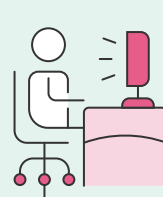

With hyper-automation and redesigned processes, companies can expect:

# 30%

cut in operational costs<sup>3</sup>

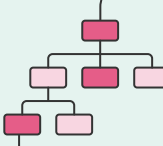

### DX Solutions

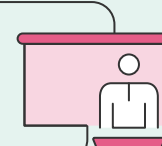

**Redesign workspaces** with open spaces and quiet zones using digital tools to promote employee well-being, collaboration and a sense of community.

**Unified communications solutions** integrate messaging, file sharing, video calls and project management tools. Streamline information sharing and enable teams to work wherever they are.

**Project management software** lets you monitor progress, assign tasks and streamline workflows more easily.

**Virtual whiteboards** support brainstorming between employees as if they were in the same room.

**Endpoint security** safeguards sensitive data even when employees work out of the office.

### Workspace

Digital spaces that enable flexible, creative and collaborative work<sup>4</sup>

# 74%

of employees want dedicated areas for collaborative work

# 83%

of employees want offices with spaces for team building and socialising

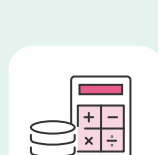

### DX Solutions

Workflow automation lets your teams work more efficiently.

**Human resource and procurement teams** can get digital documents signed on time, by the right people, in a secure way – minimising errors and delays.

**Finance teams** can avoid tedious accounting work by automating invoice processing.

Office devices equipped with data security measures ensure authorised access and the protection of **stakeholders' information**.
