

ENTERPRISE-GRADE PRINT AND SCAN REINVENTED WITH SAFEQ CLOUD PRO

SAFEQ Cloud Pro eliminates traditional print infrastructure—including print servers and print driver management—while offering full compatibility with both pure cloud and hybrid environments. It reduces IT overhead and enhances compliance and security.

ELIMINATE PRINT SERVERS AND INCREASE SECURITY

Bring print and scan securely to the cloud, and remove print servers and add secure badge (or PIN, password, mobile, or QR) print release, mobile printing, access for visitors, scanning with ABBYY OCR with meta-data workflows, and comprehensive reporting. With centralized control, always up-to-date cloud infrastructure, built-in compliance, and 99.9% uptime, it's the ideal solution for regulated industries and multi-national organizations that demand resilience, visibility, security, and simplicity.

BRIDGING CLOUD AND ON-PREM HYBRID ARCHITECTURE

- ✓ Native, zero-trust cloud design (no VPN)
- ✓ Connect **remote offices** or spool prints locally for maximum data privacy with local gateways (virtual or physical appliance)
- ✓ Legacy authentication (LDAP, Active Directory)
- ✓ Print from SAP, AS/400, or from legacy/Unix/Linux/Mainframe systems via API
- ✓ Maximum data sovereignty & residency with optional dedicated hosting

SAFEQ CLOUD: A POWERFUL ENTERPRISE PLATFORM

- Eliminate print servers
- No print driver management
- Location-aware automatic printer mapping for direct printing
- Secure print release with Print Roaming
- Scanning with ABBYY OCR, metadata on MFP, barcodes
- Entra ID, Google, OIDC, OAuth, PingID, AD, LDAP
- MFP/Printer vendor agnostic
- Mobile printing via iOS and Android app
- SAP, AS/400, and API printing
- Audit logs for print and scan
- Guest printing for visitors
- 99.9% availability and 4 business hours support for critical incidents
- Optional gateways to connect remote offices and increased data privacy
- Optional OMNI Bridge appliance to host gateways in server-less environments
- Optional dedicated infrastructure
- Optional Premium 24/7 Support

SAFEQ Cloud Pro Hybrid Architecture & Enterprise Readiness

Data Sovereignty & Residency

Many jurisdictions and public-sector frameworks require data to remain within national borders or under direct control. SAFEQ Cloud Pro is built with sovereignty in mind, so you can keep data local, minimize risks, and simplify compliance with residency requirements.

Minimize Data Exposure (“Privacy by Design”)

To uphold least-privilege and data-minimization principles, organizations avoid sending full documents to third-party systems. SAFEQ Gateways enable local spooling, keeping content within the LAN.

Remote Branches

Large jobs (CAD, graphics, booklets) can be hundreds of MB. Spooling locally avoids WAN hair pins and reduces congestion, improving time to print and user experience—especially at bandwidth constrained branches.

Mobile Direct Print

Mobile Direct Print lets users print from iOS or Android. Mobile print experience for your hybrid workforce, contractors, visitors, and temporary workers.

Legacy Embedded Terminals

Legacy SAFEQ Embedded Terminals (such as KM OpenAPI, HP OXP/d, and others) that don't have pure cloud connectivity capability can easily connect via the SAFEQ gateway.

Local LDAP or Active Directory

SAFEQ Gateway supports hybrid identity setups by integrating users not yet migrated to cloud-based systems alongside other identity providers.

Hardware of Software Appliance

SAFEQ Gateways are centrally managed and updated. Available as software package or enterprise-grade secure hardware appliance designed for 24/7 operations.
