

MPS Guardia

Complement your sustainability journey with managed print service

Sustainability and environmental responsibility are crucial for businesses today, as they face increasing pressure to reduce their carbon footprints and minimise waste. However, without the right information, developing effective sustainability initiatives can be challenging.

MPS Guardia, along with our reforestation partner PrintReleaf, provides businesses with valuable insights into the environmental impact of their printing practices. By offering actionable data, this service enables companies to adopt strategies that reduce their carbon footprint and align with broader corporate sustainability goals. Business customers can enrol in PrintReleaf's reforestation program to offset their paper usage by planting trees, making a positive impact on the environment and reinforcing their commitment to sustainability.

Supporting sustainability initiatives with managed print service

Print Infrastructure Optimisation

- Energy-efficient printers
- Optimised print devices
- Serverless MPS

Sustainable Print Management

- Print policies and controls
- Detailed print usage analytics
