

Environmental Policy

“*Sustainable development*” is the most important issue for our planet, the human race, and all business entities in the 21st century. Through all products and services and businesses, we will strive our contributions to “sustainable development” by initiative to address climate change, promote resource circulation, ensure chemical safety, preservation for regional environment and biodiversity conservation.

FUJIFILM Group Green Policy

Based on *FUJIFILM Group Green Policy*, **FUJIFILM Business Innovation Vietnam Company Limited** as a document solution provider in Vietnam will strive for the excellence in our environmental performance and the prevention of global pollution that impacts to customer, employee and other people.

This policy shall apply to our entire operations of FUJIFILM Business Innovation Vietnam.

1. **Compliance Obligation:** We will not only comply with all legal restrictions and regulations in the industry but also our internal rules and standards.
2. **Resource and energy saving efforts:** Based on the result of environment aspect assessment, FUJIFILM Business Innovation Vietnam will promote effort to converse, reduce, recycle and reuse resource, in terms of both product and company operations.
3. **Promotion of Environmental Marketing:** We will promote environmental activities by providing eco-conscious products and solutions to contribute in improving customers’ environmental awareness.
4. **Partners Collaboration:** We will corporate with business partners to let them understand the policy and carry out business activities accordingly.
5. **Training and Education:** We will educate our employees, raise awareness of environment and urge them to act in accordance with this policy.
6. **Management System Improvement:** We will conduct audits and take other measures to further strengthen the management system.
